Move forward to the next stage with Kyocera's cloud print solution
Kyocera Cloud Print and Scan

Kyocera Cloud Print and Scan

Manage the costs of your print environment and ensure the security of your documents from the Cloud.

Kyocera Cloud Print and Scan improves the visibility of print-related costs on Kyocera devices, and is aimed at companies striving to easily install and configure a print management solution, without adding the disadvantages of server related costs.

Print and Scan Anytime Anywhere

With registrated device on Cloud, you can print at anytime, anywhere.

Security Management

Authentication is needed to release the document from MFP that can reduce the risk of unattendance printout.

Easy Print Management

Company can apply print management policy, control printing tasks and analyses the cost effectiveness with report.

Low-cost, easy implementation with no management required

Eliminates the needs to implement and manage IT infrastructure.

Benefits for Cloud Solution:

Cost Saving / Pay-as-you-use

By using Kyocera Cloud Print and Scan, you are only paying for the Service (SaaS), and no other initial investment is needed.

Improved Productivity

Kyocera Cloud Print and Scan is a cloud-based printing / scanning application, employee can easily print and scan from the cloud anytime, anywhere.

Secure Protection

Using the Client Spooling function, the print job can stay within the customer network and can be released from any device – only the metadata will be stored in the Cloud (AWS).

Worry-free Maintenance

No need to maintain the hardware and software for this service.
